LRAD UAVX 500

Lightweight, Portable, Long Range Communication

SELF-CONTAINED, PORTABLE COMMUNICATION SYSTEM

The LRAD UAVX 500 is a compact and self-contained communication system designed for tactical and on-the-ground communication. It provides clear, long-distance audio transmission, ideal for use in noisy environments or during critical operations.

The LRAD UAVX500 delivers unmatched vocal clarity and operates at max SPL 154 ± 2 dB.

It is also four to six times louder than other acoustic hailers of similar size and weight. Thanks to LRAD's advanced driver and waveguide technology, it ensures that every message is transmitted clearly and understood, even in environments with engine noise, large crowds, sirens, and other background disturbances.

The LRAD warning tone effectively grabs attention before voice messages are delivered, offering a safer alternative to non-lethal or kinetic methods for influencing behavior.
